A religious experience is a subjective experience which is interpreted within a religious framework. The concept originated in the 19th century, as a defense against the growing rationalism of Western society. William James popularised the concept. Many religious and mystical traditions see religious experiences (particularly Mediated – In the mediated experience, the believer experiences the sacred [https://en.wikipedia.org/wiki/Religious\\_experience](https://en.wikipedia.org/wiki/Religious_experience)

Hippocampal volumes were analyzed using the GRID program, which is based on a to a religious group, and 59% reporting that they pray at least daily [1]. [7], and a variety of religious and spiritual experiences [8], [9], [10], [11]. focused on the potential role of religious factors in hippocampal atrophy.

Setting Volume The magnetic stimulation reported in them run from a quarter of the field strengths used in TMS (1 Tesla) to less than a millionth of that value.” .
